About Me

Expert iOS Developer at Migros One, building Moneyfinans, Migros's digital finance experience, with Swift, SwiftUI and UIKit on a modular, SDK-based architecture. Previously owned an app end-to-end and led the payment screen redesign at Pazarama. Accelerates development with custom AI agents, a modular "Skills" architecture and MCP integrations, and builds on-device ML experiences with CoreML.

Work Experiences

Expert iOS Developer, *Migros One* 07/2026 - Present
- **Fintech Features:** Developing customer-facing financial flows in Moneyfinans with Swift, SwiftUI and UIKit, focused on clear and consistent transactions.
- **App Integration:** Contributing to the integration of Moneyfinans into the Migros app on a modular, SDK-based architecture, including release work.
- **Product Analytics:** Implementing analytics to understand user journeys.
- **Quality:** Strengthening reliability through careful error handling and unit testing.

iOS Developer, *Pazarama* 12/2022 - 07/2026
- **Payment Systems:** Led the redesign of payment screens and integrated diverse payment methods, modernizing transaction flows.
- **Solo Product Delivery:** Built the Pazarama İş Ortağım app from scratch and owned it end-to-end.
- **AI-Driven Development:** Engineered custom AI agents and evolved them into a modular "Skills" architecture with helpers for TDD, Code Review and Widget & Live Activities generation; connected Xcode, Figma, SonarQube and Crashlytics via MCP.
- **Feature Delivery:** Shipped Pazarama Plus, Süper Çekiliş and Kazı Kazan.
- **Architecture:** Built maintainable code with MVVM, Repository and Coordinator patterns, and two-way communication between native iOS and WKWebView.
- **App Maintenance:** Maintained Pazarama, Pazarama İş Ortağım and Maximum Mobile apps.

iOS Developer Intern, *Magis Technology* 04/2021 - 06/2021
- Contributed to the development of an e-sports gaming platform application using Swift, MVVM, and REST APIs

Skills

Core Technologies – Swift, SwiftUI, UIKit, CoreML, REST API, WidgetKit, Live Activities, Dynamic Island

Architecture & Methodologies – MVVM, Agile & Scrum, Repository Pattern, Coordinator Pattern, TDD, Unit Testing, Modular SDKs

Tools & SDKs – Git, Swift Package Manager (SPM), Xcode, SonarQube, Crashlytics, Figma, Adjust, Dengage

AI & Innovation – Skills, Model Context Protocol (MCP), Custom AI Agents

Education

Computer Engineering,
Yıldız Technical University
09/2015 - 06/2022

Personal Projects

Intelligent iOS Applications & CoreML
Engineered privacy-focused, real-time AI capabilities for native iOS applications by training custom machine learning models and integrating them via CoreML.

SARS-CoV-2 Detection Using Chest X-Ray Images with Deep Learning Methods
02/2022 - 07/2022

Classification of Different Tissue Types in Histopathological Images
02/2021 - 07/2021
